**REPORT OF HEALTH OFFICER**

I herewith submit my report as Health Officer for the year ending January 31st, 1934.

We are again confronted with water troubles, the supply was not adequate and the quality not up to the requirements of the State Board of Health. The analysis showed an excessive iron content and clay turbidity, which would require filtration. The Selectmen immediately went to work, procured the services of competent men to investigate and report. They reported old supply not sufficient to supply, in fact not enough to fill the tank.

A special Town Meeting was called, and a committee chosen to investigate and locate a new supply and report at an adjourned meeting. Ralph Goodrich, John J. Tilton and your Health Officer was the committee.

We went to Concord with the engineer to talk the matter over. It was the opinion of the department that a new supply be obtained and after an investigation and recommendation from the State Board and the engineer a suitable location was found and

the town has voted to install a new system. Let us hope that this will end our trouble for a long period in the future.

The following contagious diseases were reported: Two chicken pox, one scarlet fever and five cases of measles. I sent up for analysis three different lots of milk, with the following report: First, all satisfactory; second, one had excessive bacteria count; third, two had excessive sediment, deemed as adulterated.

Now that our town has as we expect a good water supply, our next objective should be a sewerage system. With good water and a sewerage system, our town will be in many ways greatly benefited and up to date.

The Health Officer's duties are not always pleasant, but there must be one. If the Health Officer fails, then Judge Gilmore comes to the rescue and all is peace thereafter. Let us continue to cooperate and at all times work for the best interest of our town.

Respectfully submitted,  
GEORGE A. GILMORE, Health Officer.
